Smithsonian Nomination 1

Government & Non-Profit Sector | George Bush Sr.'s Points of Light Foundation | Nomination by ComputerWorld and Awarded

Mariotti was honored to receive the nomination for the prestigious ComputerWorld Smithsonian Award in the Government & Non-Profit sector. This nomination recognizes our innovative solutions and transformative impact on public and charitable organizations. Through strategic technology implementation, we have enhanced operational efficiency, fostered transparency, and empowered these vital institutions to better serve their communities. Our commitment to addressing the unique challenges faced by government and non-profit entities has led to significant advancements in digital services, data management, and stakeholder engagement. This nomination underscores our dedication to driving positive change and supporting organizations that work tirelessly for the public good.

Smithsonian Nomination 2

Manufacturing Sector | AlliedSignal | Nominated by Bill Gates and Steve Balmer - Microsoft

The AlliedSignal Information Technology team is thrilled to be nominated by Microsoft for the ComputerWorld Smithsonian award in the Manufacturing sector. This accolade highlights our contributions to advancing manufacturing processes through cutting-edge software development and innovative solutions. Our work in this sector has been focused on optimizing production efficiency, enhancing supply chain management, and integrating smart technologies to drive industry transformation. By leveraging Microsoft's powerful tools and platforms, we have been able to deliver tailored solutions that address the specific needs of manufacturers, leading to improved productivity, reduced operational costs, and greater overall competitiveness. This nomination reflects our ongoing commitment to advancing the manufacturing industry through technological excellence.

Smithsonian Nomination 3

Business & Related Services Sector | AlliedSignal | Nominated by Bill Gates and Steve Balmer - Microsoft

The AlliedSignal Information Technology team is pleased to receive a nomination for the ComputerWorld Smithsonian Award nominated by Microsoft Award in Business & Related Services sector. This nomination is a testament to our innovative approach in providing exceptional services and solutions to businesses across various industries. Our focus has been on harnessing Microsoft's technology to streamline business operations, enhance customer relationship management, and drive strategic growth. Through the implementation of advanced software solutions and cloud-based platforms, we have empowered businesses to achieve greater operational efficiency, agility, and scalability. This recognition acknowledges our role in shaping the future of business services by leveraging technology to deliver impactful and sustainable outcomes.
